INSULATING DESIGN

www.isocindou.com

IsoCindu respects the environment

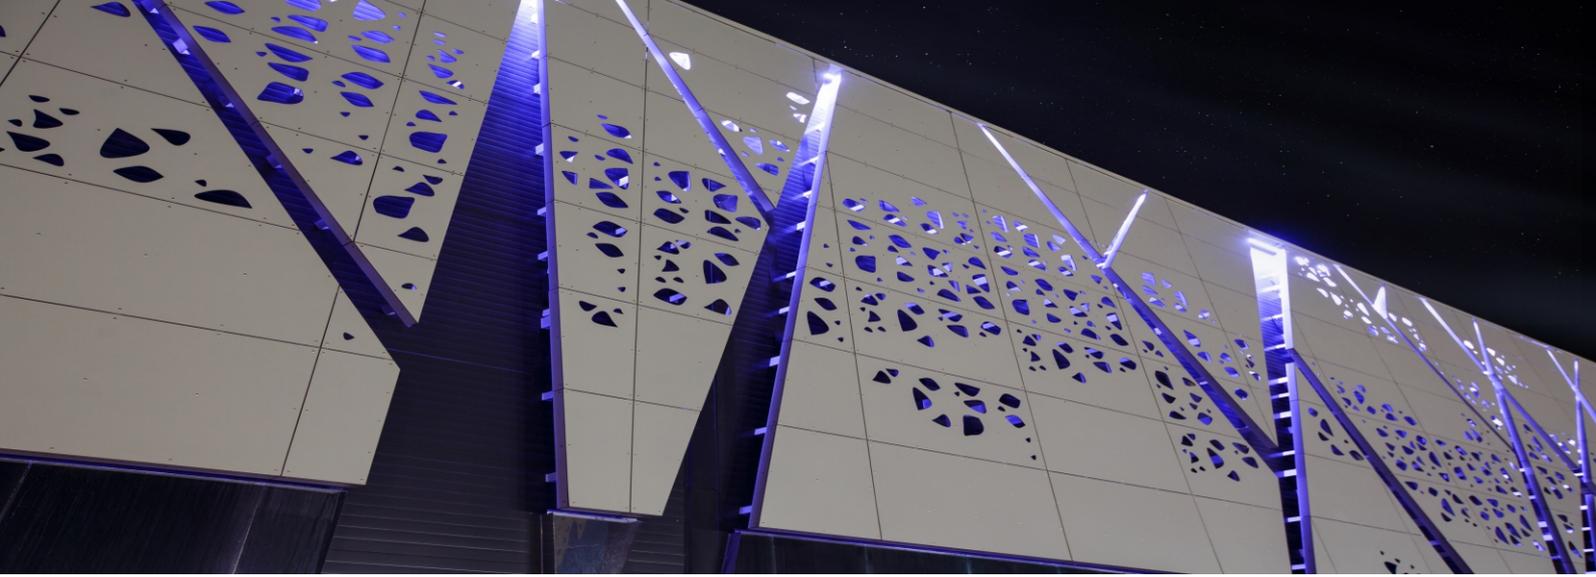

In the process of insulating panels production we don't use harmful gases for the atmosphere and we contribute to protect the ozone layer.

Since 1930, the chlorofluorocarbons (CFCs), have had widespread, specially in the cold storages and as propellants in the sprays, these gases, which they are also used to produce insulating foam, contain chlorine, responsible of the destruction of the ozone present in the atmosphere that filters the solar rays that protect us from the damaging effects of the UV rays. IsoCindu has replace in the production process these gases for **cyclopentane**, a expandent element that evaporates at the end of the process without causing any damages to the atmosphere.

Using Cyclopentane in the polyrethane foam, IsoCindu does not harm the environment.

IsoCindu use innovative techniques and technologies for more than 20 years of activity in a high competitive markets with elevated requirements of security and sustainability such as European Standards.

The ideal solution for any requirement.

IsoCindu produces and distributes insulating panels for wall and roof with a high thermal insulation for different sectors: Industrial, commercial, cold storages, farms, etc.

IsoCindu has developed sound-absorbing panels with mineral wool, also with high resistance to fire and systems for architectural walls.

With a wide variety in products, colors and finishes it allows different custom solutions and innovative designs.

IsoCindu was born in 2015 in Silao, Gto. México, thanks to the strategic alliance with Manni Group and Cindu Group.

Isopan is an Italian company, leader in the production of insulating panels, fire and sound proof for walls and roofs. Founded in 1975, currently it has 7 production factories around the world: Italy (Verona and Frosinone), Spain (Tarragona), Germany (Halle), Rumania (Bucarest), Russia (Volgograd), México (Silao) and office centers in France and Czech Republic. The facilities and technologies from Isopan are one of the most advanced, achieving a high quality and innovation in the products, taking a full care of the environment. Isopan produces 12 millions of square meters of panel per year for more than 40,000 clients.

Cindu is a Latin American company with Venezuelan origins, dedicated to design, manufacturing and commercialization of corrugated sheets for roof systems. Founded in 1955, currently operates through distribution centers in: México, Panama, Guatemala, Colombia, Costa Rica, United States and Salvador, reaching as a group a total of sales over 200MDD. Cindu offers consulting, supplies and installing constructive solutions for roofs, walls, interiors and coating for different sectors in the market; industrial, farms, hospitals, institutional, etc.
